

JOHN SUPPE

John Suppe is Chair Professor of Geology at National Taiwan University. He attended Yale University for graduate school and earned a Ph.D. in 1969 in structural geology, after which he was a National Science Foundation postdoctoral fellow at the University of California at Los Angeles from 1969 to 1971. He joined the faculty at Princeton University in 1971, and was named Blair Professor of Geology in 1988. Suppe served as department chair from 1991 to 1994. During his time at Princeton, Suppe was a visiting professor at National Taiwan University (twice), California Institute of Technology (twice), University of Barcelona, Nanjing University, and Ludwig Maximillians University in Munich. In 2007, John moved to Taipei and joined National Taiwan University, as Chair Professor.

He is an author or editor of five books and professional volumes. One of these books is a very successful textbook entitled, *Principles of Structural Geology*. Suppe's work has been recognized by the profession through numerous honors and awards. He was elected a member of the US National Academy of Sciences in 1995. He received an unprecedented two Best Paper Awards and a career contribution award, from the Structural Geology and Tectonics Division of Geological Society of America. He was a Guggenheim Fellow and a Guest Investigator for the NASA Magellan mission to Venus. He received the Research Prize of the Alexander von Humboldt Foundation and the Wilbur Lucius Cross Medal from Yale University.
