

Australian Space Weather Activities and Plans

MARC DULDIG¹, IVER CAIRNS²

¹*Department of the Environment and Heritage, Australian Antarctic Division*

²*School of Physics, University of Sydney*

A review of the present Australian activity in Space Weather research and forecasting is presented together with a summary of the Australian Space Weather Plan to 2010 and beyond. Australian researchers are in the process of developing a decadal plan for all solar-terrestrial research (that will include aspects of the space weather plan) and this process will also be described.
