

HARUICHI WASHIMI

Dr. Haruichi Washimi graduated from Tokyo Institute of Technology in 1964. He worked as a research scientist at Research Institute of Atmospherics, Nagoya University (1969-2002), at Solar Terrestrial Environment Laboratories, Nagoya University (2001-2004), Sonan Institute of Technology (1994-2004), and then moved to IGPP, University of California in Riverside (2004-2008) and CSPAR, University of Alabama in Huntsville (2008-present). His main research topics are theory of nonlinear plasma wave propagations and computer analysis of solar wind and outer heliosphere.
