

Rosaly LOPES

Jet Propulsion Laboratory, California Institute of Technology

Rosaly M.C. Lopes is a Senior Research Scientist at NASA's Jet Propulsion Laboratory, California Institute of Technology. Born in Brazil, she obtained a B.Sc. in Astronomy (1978) and Ph.D. in Physics (planetary science, 1986) at University College London (University of London), UK. Her research expertise is on planetary geology and volcanology and she has studied Mars, Io, and Titan. She was a member of Galileo's Near-Infrared Mapping Spectrometer team from 1991-2003 and has been the Investigation Scientist for the Cassini Titan Radar Mapper since 2003. She is an elected Fellow of the American Association for the Advancement of Science and of the Geological Society of America, and an elected member of the International Academy of Astronautics. Among other awards, she received the Carl Sagan Medal from the American Astronomical Society and the NASA Exceptional Service Medal.
