

**J. Bruce H. SHYU**

*National Taiwan University*

Bruce Shyu is a professor at the Department of Geosciences, National Taiwan University (NTU). He received both of his Bachelor and Master degrees from NTU, and a PhD degree in Geology from the California Institute of Technology. His research interests include earthquake geology, tectonic geomorphology, paleoseismology, and surface processes, and has been working on related projects in many parts of southeastern Asia, especially in Myanmar and the Philippines. He is one of the leaders in active structure and seismic hazard research in Taiwan, and has been involved in the production of active structure and seismic hazard analysis databases for the country. He is currently serving as associate editor for the journals *Tectonics* and the *Geological Society of America Bulletin*, and is the President-Elect of Solid Earth Section of the AOGS.
